Allan Ortíz

As a seasoned web developer with over a decade of experience, I excel in collaborative environments, bringing a strong sense of responsibility and proactivity to every project. My adaptability and commitment to continuous improvement drive me to consistently propose innovative solutions. I welcome feedback with an open mind and embrace new challenges with enthusiasm, leveraging my extensive background to contribute to meaningful advancements in web development.

EXPERIENCE

Mica - Frontend Engineer

11/2022 - 12/2023

Web development of Mica's main platform. It allows the management of properties, rental processes, property services, tenant applications, broker management, checkout, balance reloads, document capture, among others.

Stack: NextJS, ReactJS, TypeScript, TailwindCSS, Cypress, React-Query, React-Hook-Form, SCRUM, Jira, GitHub.

Meru - Tech Lead Engineer

03/2021 - 11/2022

Responsible for managing front end web development teams for optimal delivery of results. Development of websites and web apps (e.g., meru.com, applications for product sales from China to Latin America, customer control systems, checkout, supplier management applications, hunters, among others).

Stack: NextJS, ReactJS, TypeScript, TailwindCSS, Jest, Vercel, React-Query, React-Hook-Form, Storybook, SCRUM, OKRs, Kanban, Jira, GitHub.

Homie - Frontend Engineer

02/2020 - 11/2020

Redesign and refactoring of legacy components. Make improvements to the Homie's platform.

Stack: ReactJS, TypeScript, Styled components, Redux, Vercel, React-Query, React-Hook-Form, Kanban, You Track, GitHub.

REPSSY - Full Stack Programmer

11/2018 - 12/2019

Web development of REPSSY inventory management, vaccination control and web modules for the Yucatan health platform, such as pharmaceutical management and disease tracking.

Stack: Angular, PHP, Laravel, TypeScript, MySQL, DHTMLX, GitHub.

SAF, Government of the State of Yucatan - Project Lead

02/2011 - 10/2018

Responsible for managing front end and backend teams, effectively supervising functions and resources. Developing public and internal websites and systems for all government secretariats.
